

[Petri Net Toolbox Matlab Download Crack](#)

Symbol	Description
P	set of places p_i –place i , p_D – discrete place, p_C - continuous place
T	set of transitions t_j - transition j , t_D - discrete transition, t_C - continuous transition
C	incidence matrix C_D – discrete part of C , C_C - continuous part of C
Pre	preconditions on incidence matrix components C_{ij} –
$Post$	Post-conditions on incidence matrix components C_{ij} +
M	PN marking M_0 – initial marking, m_i - marking of place p_i
α	quantity of firing in one continuous transition firing in timed function
A	vector of quantity of firing in continuous transitions firing in timed function
τ	time variable
\mathcal{T}	time vector representing operational delays of some transitions
σ_j	timed continuous firing of t_j
Σ	timed continuous firing vector
$f(\tau)$	instantaneous flow of continuous transitions firing in timed function
$\lambda[t_j]$	quantity of firing in continuous transitions firing in timed function
f_j or $f[t_j]$	Flow rate associated with t_j firing in continuous transitions
